CHAINS

Township 46 North, Range 86 West, of the Sixth Principal Meridian, in the State of Wyoming, is located in the northeastern portion of Washakie County. All of the boundaries and the subdivision lines were originally surveyed by Edward F. Stahle, U.S. Deputy Surveyor, in 1884. The south boundary was dependently resurveyed by Mark D. King, U.S. Cadastral Engineer, in 1935. The west boundary was dependently resurveyed by Marvin J. Lytle, U.S. Cadastral Engineer, in 1935.

These field notes are those of the dependent resurvey of the north, a portion of the east, portions of the west boundaries, and certain subdivisional lines of Township 46 North, Range 86 West, of the Sixth Principal Meridian, Wyoming.

The lines of the previous surveys were retraced and a diligent search made for all corners and other calls of the field note record. Identified corners were remonumented in their original positions. Lost corners were reestablished and monumented at proportionate distances based on the latest official record and in certain cases by collateral evidence, but only after exhausting every possibility of finding direct evidence of such corners.

All corner positions described in these field notes, unless otherwise stated, are monumented with the Bureau of Land Management's standard iron post cadastral survey monument, consisting of an inscribed die-cast brass cap, permanently mounted on a galvanized iron pipe, 29 ins. long and $2\frac{1}{2}$ ins. in diameter. For the purpose of brevity, further description of this monument is eliminated from this record and will hereinafter be described only as an iron post.

The retracement data are thoroughly verified and only true line notes are supplied herewithin, which refer to the completed survey.

The directions of all lines refer to the true meridian, determined by angular measurements from the USGS triangulation station "TAYLOR ET, 1966", carried forward by transit methods and confirmed at various points along the line of survey by direct altitude observations of the sun.

The survey was executed in accordance with the specifications as set forth in the Manual of Instructions, 1947, and the Special Instructions for Group 327, dated July 22, 1969.

The geographic position of the southeast corner of section 21, determined by traverse to USGS triangulation station "TAYLOR ET, 1966", is: Latitude $43^{\circ} 55' 53.1''$ N., Longitude $107^{\circ} 11' 14.5''$ W.

The mean magnetic declination was observed to be $15\frac{1}{4}^{\circ}$ E.

GENERAL DESCRIPTION

Township 46 North, Range 86 West of the Sixth Principal Meridian, Wyoming, is 15 air-miles southeast of Ten Sleep in Washakie County.

The area bounded by this survey is generally mountainous. The soil is sandy and rocky with a vegetative covering of: grass, sagebrush, juniper, service berry and pine and aspen timber appearing generally on the north and east slopes of the deep ravines and canyons.

Spring Creek and numerous springs throughout the township provide an excellent water supply for livestock. Summer grazing is the primary use of this area. Secondary uses are the minor logging operations which have been conducted in the past and winter feeding grounds for big game animals.

Elevations range from 8,000 ft. in the northeast to 5,600 ft. in the southwest. All drainage is to the northwest, west and southwest via Cook's Canyon, Jacob's Creek and Spring Creek, respectively.

Access through the northern portion is via Rome Hill Road, bladed dirt, which bears generally east and west. Other access is quite limited due to the box canyons and deep ravines, especially in the southwest.

There are no permanent inhabitants in this township. However, there are many sheep camps which are used during the grazing season. Mineral activity is non-existent within the area of this survey.

The access road to the Girl Scouts National Center West runs through sections 5 and 6.

[illegible]

CERTIFICATE OF SURVEY

I, Francis D. Eickbush, Jr., HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 22nd day of July, 19 69, I have dependently resurveyed the north boundary, a portion of the east boundary, portions of the west boundary, and certain subdivisional lines of Township 46 North, Range 86 West,

of the Sixth Principal Meridian, in the State of Wyoming, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.
